

iFIX Value Package from GE Digital

Decision Support for your Operations

Increase profitability and productivity on any budget

Can you afford lost time?

How about lost productivity or revenue?

Then you can't afford less than the best from your HMI/SCADA software.

Less than the best means you may not know when something goes wrong with your machines. You also don't know what really requires your operators' attention or how to decide what to address first.

At GE, we believe HMI/SCADA software should do more than monitor your machines; it should support your decisions. We also believe that high value shouldn't come with a high cost.

Our best-in-class monitoring and visualization capabilities can make your team's decision making more proactive and profitable than you've ever experienced—whatever your budget.

Today's SCADA is more than just monitoring and visualization. The HMI/SCADA should be a decision support system, enabling teams for their best performance. You can enable Smart Operators with Decision Support HMI/SCADA to increase efficiency and reduce costs.

Benefits

- Leverage your HMI/SCADA as the foundation for an efficient operation
- Drive the right response on the alarms that matter
- Increase consistency and conformance to standards
- Improve accountability on task completion
- Prevent mistakes, quickly identify problems, and get on-demand support

Increase profitability and productivity on any budget

Increase profitability and productivity on any budget

iFIX Value Packages Components

Webpace: A Full Featured Web Client. Supports full control and visualization capabilities over your company Intranet or secure Internet without the need to change or alter your software application. It can be set up within minutes. Also accessible from your iPad and Android device.

Historian: A powerful enterprise-wide data historian that collects, archives, and distributes tremendous volumes of production information at extremely high speeds. The industry's high performing, fast innovating, time-series data historian is also easy to use.

Alarming: Advanced Alarm management includes 7 Priority Levels, alarm transition counters, alarm inhibits and suppression, remote acknowledgement and more. Define the Alarms Areas based on the physical or logical areas of your plant and/or process and assign Alarms Areas to operators, supervisors and managers, so they can concentrate on their area(s) of responsibility.

Excel Add-In to Historian for SCADA: Excel add-in for simple data analysis

Dream Report Starter Pack: A real-time report generator based on an easy, configurable user interface. Leverage your automation data to generate the reports you need to improve performance and meet your goals.

Symbol Factory-Dynamos: A full set of ready-to-use objects that will help you speed up the design process.

Designer/Development Mode: Configure your own operator screens, alarm strategy, and more.

IGS Basic Drivers: A choice of over 100 protocols for the most common devices in the automation industry.

Real-Time Tags: For data acquisition and alarm generation.

Workflow for Integrated SOPs: Guide operators with clear, step-by-step, interactive work instructions & ensure the right actions and reduce response and/or troubleshooting time, anywhere anytime.

GlobalCare: GlobalCare is award-winning web- and telephone-based services program. It provides valuable information, so you can be more agile, more effective and more competitive. Optimize your investment with our rapid deployment and ongoing solution support. GlobalCare makes your operations our priority. We are invested in your success.

About GE

GE (NYSE: GE) is the world's Digital Industrial Company, transforming industry with software-defined machines and solutions that are connected, responsive and predictive. GE is organized around a global exchange of knowledge, the "GE Store," through which each business shares and accesses the same technology, markets, structure and intellect. Each invention further fuels innovation and application across our industrial sectors. With people, services, technology and scale, GE delivers better outcomes for customers by speaking the language of industry.
