

GT200-MQ-IE

Modbus / Industrial Ethernet /
MQTT Gateway

Example of Connection

Product Overview

Our newest Industrial Ethernet gateway has the capabilities to connect various PLCs (Rockwell, Omron, Schneider, etc.), fieldbus instruments and devices to the Cloud Servers, such as Microsoft Azure, Amazon AWS, Alibaba Cloud and customized Servers that support MQTT protocol.

Technical Specifications

- [1] Supports connecting Modbus / Modbus TCP master and slaves and EtherNet/IP master to the MQTT servers.
- [2] Supports 2 DI and 2 DO channels.
- [3] Supports MQTT connection via 4G/5G mobile network.
- [4] Supports GPS.
- [5] Supports SSL V3.0 and TLS V1.0/V1.1/V1.2, ensuring a secure and safe communication.
- [6] MQTT version 3.1.1 supported.
- [7] Supports updating and restarting the gateway remotely.
- [8] Power supply: 24VDC (11V-30V).
- [9] Operating Temp: -4°F to 140°F (-20°C to 60°C), Rel. Humidity: 5% -95%, non-condensing.
- [10] Dimension (W* H* D): 34mm* 116mm* 107mm (1.33in* 4.56in* 4.21in).
